Teorema do Thevenin (circuito equivalente)

Teorema do Norton

Corriente de Norton: $I_N = I_{CC}$

Lei do Kirchhoff de tensões

Lei do Kirchhoff de tensões (aproximação)

Lei do Kirchhoff de tensões (aproximação)

Lei do Kirchhoff de correntes

JACHD

21

Lei do Kirchhoff de correntes

1,38+1,86=3,24

Teorema de superposição

Teorema de superposição (substituir V2)

Teorema de superposição (substituir V1)

Soma de efeitos

Um Dispositivo Aberto

Lembre-se sempre desses dois fatos sobre um dispositivo aberto:

- A corrente através de um dispositivo aberto é zero.
- A tensão é indeterminada.

Um Dispositivo em Curto-circuito

Um dispositivo curto-circuitado é exatamente o oposto. Lembre-se sempre desses dois fatos sobre um dispositivo em curto-circuito:

- A tensão no dispositivo é zero.
- A corrente é indeterminada.

Defeitos e sintomas

Defeitos	V_A	VB
Circuito OK	6 V	3 V
R ₁ aberto	O and a second	0
R ₂ aberto	12 V	6 V
R ₃ aberto	6 V	0
R ₄ aberto	6 V	6 V
C aberto	12 V	6 V
D aberto	6 V	6 V

Defeitos e sintomas (R2 aberto)

JACHD

32

Defeitos e sintomas

Defeitos	VA	VB	
R ₁ em curto	12 V	6 V	
R ₂ em curto	0	0	
R ₃ em curto	6 V	6 V	
R ₄ em curto	6 V	0	

Defeitos e sintomas
